

# WEALTH WORLD CUP 2026: WHAT IS ON YOUR FINANCIAL TEAM SHEET?

STUART REILLY Independent Financial Adviser

As the FIFA World Cup 2026™ gets underway, it is the perfect time to ask: how balanced is your financial team sheet?

From your emergency cash buffer acting as goalkeeper to your pensions anchoring the midfield engine room, every position has a specific role to play in securing your long term future.

## The 4-2-3-1 Team Sheet

### GK: Emergency Cash

A crucial line of defence. Helps to sweep up dangers such as a broken boiler or sudden job loss, so the team can play without fear.

### LB / RB: Income Protection & Critical Illness Cover

The full-backs covering the flanks. Their aim is to protect your everyday lifestyle, helping to ensure the bills are paid if you get sidelined by injury or illness.

### CBs: Life Cover & Wills

The bedrock of the club. They do not join the attack. Their only job is to help protect your family and home no matter what happens on the pitch.

### DMs (The Double Pivot): Work & Personal Pensions

The engine room. They sit deep, staying invested through market volatility, and quietly compound over decades while aiming to beat inflation and anchor your long-term future.

### LAM / RAM: General Investment Accounts & AIM Investments

They are the wingers whose aim is to provide pace and growth. They could when required step up the risk profile to help capture broader market returns and specialist UK business growth.

### CAM (The No. 10): Stocks & Shares ISAs

They could be seen as the playmaker. Flexible and tax-efficient, they can help support medium- to longer-term goals and adapt as circumstances change.

### ST: VCT & EIS Investments

Sometimes viewed as the lone striker. They focus on higher-risk, and face the toughest tackles in early-stage companies and may offer attractive tax benefits, with the aim of enhancing returns, although outcomes are uncertain and capital is at risk.

### Get a financial coach in your corner

Every world-class squad needs a manager on the sidelines. You wouldn't send a team into a major tournament without a tactical game plan and someone to make the most appropriate substitutions when conditions change. That's where we come in.

Let's review your financial team sheet together.

This article is intended for general guidance only and is based on the opinion of Continuum it does not constitute financial advice. Individual circumstances vary, and you should consider seeking advice from a regulated financial adviser before making any decisions about your Savings, Investments, or retirement planning. The value of an investment can go down as well as up. When investing Capital is at risk. The Financial Conduct Authority does not regulate taxation advice, trust advice or will writing and deposit accounts. A pension is a long-term investment; the fund value can go down as well as up and this can impact the level of pension benefits available. Pension Income could also be affected by interest rates at the time benefits are taken. Pension savings are at risk of being eroded by inflation. Investors in ISAs do not pay any personal tax on income or gains. Levels and basis of reliefs from taxation are subject to change and their value depends upon your personal circumstances. We recommend seeking professional advice on personal taxation matters. In relation to critical illness cover, if premiums stop, then cover will lapse. Cover is subject to terms and conditions and may have exclusions. Definitions of illnesses vary from product provider and will be explained within the policy documentation.
